Headquartered near Bordeaux, CEHTRA has a European/global footprint with 50 consultants in France (Bordeaux, Lyon, Paris), Germany, Belgium, Spain, United Kingdom, Canada, and India.

About this job offer

As Regulatory Affairs project manager, Biocides, you will work within a team managing European Biocides legislations (BPR) or Worldwide legislations for our customers in different countries. This position is a real opportunity if you have a strong experience in regulatory affairs, are confident with customer relationship, able to take initiative, autonomous and enjoy teamwork. Salary will depend on your experience and degree.

Your Key Missions:

In this context, you will oversee the following tasks:

- Project coordination and management : Biocide product dossiers / Biocide products family dossiers / Active substance dossiers
- Customer relationship
- Regulatory strategy & advise

Skills and experience on Biocides like legislations in US, Latin America and Asia are considered as an added value. You will work within a team with different expertise and you will need to be autonomous to manage regulatory projects.

Your profile:

Academics

Hold a relevant degree, or equivalent, in chemistry, microbiology or other related scientific area

Experience

Have experience in a similar position for 5 years minimum.

Skills

Language(s): Fluent in English, French would be an advantage but is not essential.

Team spirit

You should be autonomous and enjoy teamwork
